**Subject:** Improved health for all Kentuckians

Dear Ms. Mullins,

I am encouraged to hear about new legislation that may enable health care providers to work toward improved health for all Kentuckians. I recently became aware of a memo from the [Kentucky Office of Health Policy](#), regarding efforts to modernize the process so as to "better enable health care providers to work toward improved health for all Kentuckians." As a growing small business providing PT, OT, and Speech therapy services I am excited about the possibility of being able to provide services for families who are covered by Medicaid.

It was noted that the state will look for ways to support the evolution of health care delivery and will incentivize providers for developing a full continuum of care as well as providing high quality of care. Please keep me updated in this and let me know if there is anything I can do to assist in this process to improve access to care for our Kentucky families. I do strongly believe that early intervention is key in developing improved outcomes.

Thanks for your help!
